PART A. PREPARING FOR THE JOURNEY

STEP 1: How Learning is Constructed in UMathX

Click on the link to ... [Empowering Students To Construct Their Learning](#)

Summary: How Learning is Constructed in UMathX

- In this **Exploration of Mathematics Content and Teaching Methodology** we use **UMathX**, a learning environment for K to Algebra1. UMathX is the 10th version of “**Understanding Math**”.
- In **UMathX** learners are encouraged to **grapple** with ideas, concepts and strategies towards **constructing** new knowledge **through understanding**. The teacher is not a teller.
- Information flows from **short term to long term memory** through the vehicle, “**Understanding**”.
- **Students** are the **Builders** of their own knowledge. **Questioning** is the key to **Understanding**. **Understanding** is achieved by **Association**.

STEP 2: UMathX .. Possible Learning Environments

STEP 3: Play the video <http://www.jamesnottingham.co.uk/learning-pit>

“UMathX transforms a “Valley of Despair” into grappling in a “Learning Pit.” Dr MKendal, Houston Math Supervisor

“The UMathX Learning System continues to be the best I have seen.” JPyper - Faculty of Ed, Queens U, Kingston, On

“Content and Teaching Methodology are exceptional.” Master teachers, Faculty of Ed. LSU, USA.

“The Neufeld system is by far the most effective learning tool for mathematics!” JS - Australia

Content Tests cover items within a certain content area across grade levels
Custom Tests are generated by the teacher by choosing any specific content.

- **Analyze Data” in the Main Menu.** The “Data Module” requires data by students. The full version allows students to do lessons and tests with results recorded into perpetuity. A teacher or student can then check student data .. **tests, lessons, useage, growth and more.** After a student has created data, the teacher of that student could do the following:
Select “Analyze Data”. Select “Test Data”. Select a class or a student, a test category and a test. Click on a specific vertical, then horizontal bar. Click on a question that was answered incorrectly.
2 choices. 1 - see results. 2 - launch an appropriate lesson.
