

This is a list of words to be used along with Measurement and Geometry – Section 3: Circles. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

### Section 3: Circles

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
add distance radius center parallelogram base diameter surface area around square circle height r (radius)	circle radius (r) diameter (d) circumference (C) pi $\pi$ distance area square compass straight line center point endpoints length perimeter side edge curved closed shape surface square units estimate parallelogram area of parallelogram = base $\times$ height semi circle
