

This is a list of words to be used along with Algebra – Section 5: Adding Expressions. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

### Section 5: Adding Expressions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
binomials trinomials number formula twice double reverse straight triangles equilateral width length	adding expression algebra tiles x square tiles x tiles y tiles combine opposites rearrange group the like terms
