

This is a list of words to be used along with Algebra – Section 7: Multiplying Expressions. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 7: Multiplying Expressions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
same addition multiplication monomial add no binomial	product distributive law patterns formulas substitution monomial binomial multiply simplify multiplication of expressions unit tile area square unit variable represents tile x tile x^2 tile y tile y^2 tile term powers base exponent rectangle total area length width units product constants brackets sum FOIL (First Outside Inside Last) dimension
