

This is a list of words to be used along with Equations – Section 4: Solving Multi-Step Equations. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

### Section 4: Solving Multi-Step Equations

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
like variable multiply both balanced operation solution algebraically original algebra evacuate correct value	equation Isolate terms variable negative positive lowest common denominator tiles like terms simplify solutions literal equation
