

This is a list of words to be used along with Fractions – Section 10: Multiplying Fractions. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 10: Multiplying Fractions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
	fractions multiply whole hexagon thirds half parts quarters total third product equal parts of numerator denominator greatest common factor (GCF) common factor simplify
