

This is a list of words to be used along with Graphing – Section 3: Points on a Grid. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 3: Points on a Grid

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
third x origin y fourth order	point on a grid regions Axis ordered pairs vertical axis horizontal axis y axis x axis origin intersect quadrant first quadrant second quadrant third quadrant fourth quadrant Cartesian plan x-coordinate y-coordinate units positive x direction positive y direction negative x direction negative y direction locate precise integer object A ¹ A primed positive direction negative direction Y direction X direction Mapping Rule coordinates vertices grid order equivalent
