

This is a list of words to be used along with Graphing – Section 9: Quadratic Functions. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

### Section 9: Quadratic Functions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
lowest highest minimum maximum vertex narrow same subtract quadratic parabola greater than 0 up down positive negative less than 0 number price straight	quadratic values parabola vertex axis of symmetry concave up concave down symmetric x-axis x- intercepts general quadratic function constant term increases completing the square quadratic function quadratic equation solutions of quadratic functions intercepts of quadratic functions
