STEP 1 – An Introduction

- “UMathX by Neufeld”, 10th version of “Understanding Math”, is an **Exploration of Mathematics Content** and **Teaching Methodology** within a digital learning environment for K to Algebra 1. It offers over 3500 lessons where implementation is modeled through 3 part tiered lessons in a variety of learning environments supporting a growth mindset, encouraging learners to grapple with concepts towards constructing new knowledge through understanding – concrete to abstract.
- "UMathX by Neufeld" Constructs Meaning through two menus. The **Content Menu** fills gaps by scaffolding mathematics along a conceptual path, across grade levels. The **Curriculum Menu** offers lessons aligned to curricula. 3 part tiered lessons, “frameworks for learning”, offer solutions to intervention. **Data Analysis** redirects learning in next steps through Content & Curriculum Tests.
- UMathX by Neufeld is partnering with Faculties of Education to **Conduct Research** on **Constructing Understanding** of **Content** as well as on **Teaching Methodology**.
