

This is a list of words to be used along with Algebra – Section 3: Patterns, Patterns, Patterns. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 3: Patterns, Patterns, Patterns

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
prime composite	patterning repeat sequence pattern identifying patterns extending patterns creating patterns number patterns geometric patterns extend formula factor pairs array row column prime number composite number common factor greatest common factor (GCF) row predict column multiplying adding subtracting dividing Sieve of Eratosthenes
