

This is a list of words to be used along with Equations – Section 5: Problem Solving. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 5: Problem Solving

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
lower black number black hair hours females red textbooks red hair perimeter students symbols weeks lower	words symbols difference double sum product one half of mathematical symbols operations numbers algebraic expressions equations times subtract divide multiply add boiling point original represents substitute temperature increased letters like terms units unknown quantity twice variable solutions width length meters
