

This is a list of words to be used along with Fractions – Section 3: Equivalent Fractions. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

Section 3: Equivalent Fractions

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
equivalent equal divide same multiply half greater	equivalent out of equal parts fraction square triangle hexagon whole sixths trapezoid fourths thirds same ninths fifty-fourths denominator numerator groups of less than (<) greater than (>) horizontal equal multiply divide division greatest common factor simplest form lowest terms product common factor
