

This is a list of words to be used along with Graphing – Section 8: Equation of a Straight Line. The words students input are the words that students need to input within the software, spelled correctly, to complete a section. These words could be reviewed before starting a section and placed on a word wall.

### Section 8: Equation of a Straight Line

Words Students Input	Words For Your Word Wall <i>(This is a list of words that students should have prior knowledge of OR they will know by the end of the section)</i>
straight slope y-intercept never same undefined constant cost less greater rate cannot whole positive price bread eggs decreasing	rise run y coordinate y axis parallel perpendicular undefined slope chart patterns solutions $y = mx + b$ integer coordinates
