

# Introduction – Suggested Use

FOR the Session...

**TEACH, don't Tell**  
**Hybrid Lessons from SURVIVE to THRIVE in 2021**  
**Mathematics**

Suggested Use for Students, Teachers and Parents of Grades 1 to 8

This video uses resources that capture the capabilities of **HYBRID LEARNING** to assist students in **UNDERSTANDING**.

Interactive resources will address the need for multi-dimensional approaches to help all children to understand.

**The menu contains:**

**10 examples, 2 humorous videos and 1 video in Introductory Coding.**

## **Suggest Use #1:**

View the entire video for an hour overall general professional learning session.

Stop signs within the video suggest where to stop and briefly discuss the video of the on and off computer solution suggested.

## **Suggested Use #2:**

View the introduction to the video. Then select videos of 1 or 2 examples of the 10 examples..

Then use the menu to select and discuss a few lessons from the selected examples and humorous videos for the group.

## **Suggested Use #3:**

Use this for a full day of professional learning for a group. Videos are viewed, on and off computer examples are worked through and discussed.

Note that we are currently in the final testing and rollout of our new JavaScript version of the software, **UMathXI**, which will function seamlessly for clients on all devices, with the same URLs, logins and passwords as they used for **UMathX**. Until that time access to **UMathX** will be solely through video and off computer examples.
